It's Time to Clean Up & Save!

Get up to **\$200** on
pre-rinse sprayers.

TAKE CHARGE™

**APPALACHIAN
POWER**

TAKE CHARGE™

An **AEP** Company

Commercial kitchens consume more energy than almost any other business, and many owners use sprayers to pre-rinse dishware before dishwashing. These pre-rinse sprayers can account for up to 30%* of water use in commercial kitchens.

Install a New Low-Flow Pre-Rinse Sprayer and Save!

New pre-rinse sprayers use less water and energy without compromising performance. Upgrading to low-flow pre-rinse sprayers can save over \$110* annually in water and energy costs.

Appalachian Power offers incentives for new pre-rinse sprayers. Earn up to **\$200†** per pre-rinse sprayer!
