

# Would your business customers benefit from lower costs on their next HVAC project?

HVAC incentives from TVA EnergyRight® can help your customers obtain high-efficiency HVAC equipment and upgrades that can reduce cooling costs and improve comfort.

Check the back for our current HVAC incentive offerings and how to apply.

PREFERRED PARTNERS NETWORK

## Eligible HVAC Project Scenarios

Existing Equipment	Recommended Energy Efficient (EE) Replacement	Like for Like   New or Expansion	Incentive (\$/ton)
VRF heat pumps (with electric resistance heat backup)	VRF heat pumps (with electric resistance heat backup)	Yes   No	\$80
VRF heat pumps (with or without electric resistance heat backup)	VRF heat pumps (without electric resistance heat backup)	Yes   No	\$80
Dual fuel heat pumps	Dual fuel heat pumps	Yes   No	\$80
Unitary heat pumps (with electric resistance heat backup)	Unitary heat pumps (with electric resistance heat backup)	Yes   No	\$80
Unitary heat pumps (with or without electric resistance heat backup)	Unitary Heat Pumps (without electric resistance heat backup)	Yes   No	\$80
Unitary air conditioners (AC)	Unitary AC	Yes   No	\$80
Unitary air conditioners (AC)	Unitary AC - advanced tier efficiency	Yes   Yes	\$175
Unitary AC (with electric resistance heat backup)	Unitary heat pumps (with electric resistance heat backup)	Yes   No	\$80
Gas Heat	Dual fuel heat pumps or VRF (without electrical resistance heat backup)	No   No	\$250
New installation or expansion	Dual fuel heat pumps or VRF (without electrical resistance heat backup)	No   Yes	\$250

## Current HVAC Incentive Offerings

**\$80/ton or \$175/ton**

Energy efficient heating ventilation and air conditioning (HVAC) replacements.

**\$175/ton**

Expansions and new installations.

**\$250/ton**

Qualified variable refrigerant flow (VRF) and dual fuel heat pumps.

## Ready to apply for incentives?

Access your PPN dashboard to start an online incentive application:
