Home Performance Program

Contractor Guide

INCENTIVES

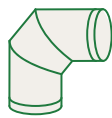

By performing Home Energy Assessments (HEA) you can help residential customers find energy-saving opportunities through Appalachian Power's Home Performance Program.

As a Home Performance Energy Advisor, you play an important role in identifying areas where customers can make energy efficiency upgrades. Your assessment is documented and provided to the customer in a HEA Report.

Incentives are available for various projects, including:

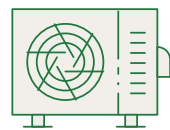

LIGHTING

DUCT SEALING

INSULATION

HVAC

3 Homes must be heated with electric heat to qualify.

10 Brushless permanent magnet ECM blower motor must replace existing, non-ECM blower motor.

11 Attic insulation must increase by at least R-20 and meet the R-38 building code.

12 Incentive may not be combined with direct install Caulked Penetration, Outlet Gasket, and Door Sweep measures.

13 Blower door test required for whole home air sealing with a minimum 10% reduction. Contractors should target the highest sources of air leakage first, such as major penetrations in the attic, basement, or crawl space.

14 Incentives are offered based on blower door test percentage reduction, with a maximum of \$180 per home and \$85 per home based on heating type present. Minimum incentives shown are for a 10% reduction.

15 Installed insulation must be minimum R-13 for 2x4 walls and R-19 for 2x6 walls.

16 Solar screen must have openness factor ≤ 5%.

17 North facing windows are not eligible.

18 Windows must have U-Value ≤ 0.25 and SHGC ≤ 0.40.

19 Cellular shades must be double cell design and be installed on at least 75% of a home's windows.
