

Upgrade Your Home **AND SAVE!**

As a residential customer, you are eligible to receive cash-back incentives for energy efficiency upgrades through **Appalachian Power's Home Performance Program**. It's simple! An energy advisor will visit your home to provide a **NO COST** Home Energy Assessment (HEA) and install energy-saving measures to help you save money.

BUT WAIT, THERE'S MORE!

Income-eligible households can now take advantage of even bigger incentives! **Home Performance Plus (HP Plus)** provides a variety of energy-saving improvements beyond the initial HEA.

COMMON ENERGY UPGRADES FOR YOUR HOME:

LIGHTING

LED replacement lamps can pay for themselves in energy savings within a year.

HVAC

HVAC costs can account for 65% of your home's energy use. Replace inefficient systems and save.

HOT WATER

An energy-efficient water heater can help reduce your monthly electricity bills.

INSULATION

Adding proper insulation to your home can help save money on both heating and cooling.

AM I ELIGIBLE?

- Virginia single-family detached homes, townhomes and duplexes served by Appalachian Power are eligible for the Home Performance Program. Renter-occupied homes are also eligible with electrical service in the occupant's name and written consent from the property owner.
- Your home must be heated by electricity to qualify for certain measures and incentives.
- Enhanced incentives through HP Plus are available to residential customers who meet income eligibility requirements. Contact us to learn if you qualify.

HOW IT WORKS

Simply schedule a Home Energy Assessment and a Home Performance Energy Advisor will evaluate your home, install energy-saving measures, and provide you with a comprehensive HEA Report.

Sign up online at TakeChargeVA.com or call **833.402.2221** to schedule a time for an assessment.
