ENERGY SAVINGS FOR COMPRESSED AIR SYSTEMS

TAKE CHARGE™

## ENERGY EFFICIENCY

A compressed air system is essential for a smooth operation, but it does use a lot of energy and increases your energy bill. Appalachian Power's TakeChargeVA Business Energy Solutions and Custom Programs have a solution for you to save energy and boost your bottom line. For example, installing a no-loss condensate drain can reduce energy consumption, improve air quality, increase system uptime, improve safety, and reduce maintenance costs.

## SAVINGS IN ACTION

The Appalachian Power Business Energy Solutions and Custom Programs provide cash rebates and technical assistance for certain cost-effective energy efficient projects.

The TakeChargeVA Programs can assist with your facility's compressed air projects. We provide financial incentives for upgrading to new energy efficient equipment and acting as your trusted energy advisor. We can even help you with the paperwork so you can focus on running your business.

If you have additional questions, please visit [TakeChargeVA.com/Business](https://TakeChargeVA.com/Business) or call 833-402-2221.
