

# NO-COST ENERGY ASSESSMENT

Identify potential **energy-saving** opportunities in your home.

**APPALACHIAN POWER**  
An AEP Company

TAKE CHARGE

## LIGHTING

LED replacements for fluorescent lamps can pay for themselves in energy savings within a year.

## HOT WATER

An energy-efficient water heater can help reduce your monthly electricity bills.

## HVAC

Replace inefficient HVAC systems because heating and cooling costs can account for as much as 65% of your home's energy use.

## INSULATION

By adding proper insulation to your home, you can save money on both heating and cooling.

## WHAT TO EXPECT

- An approved Home Performance Energy Advisor will visit your home, provide a **NO COST** Home Energy Assessment (HEA), and install free energy-saving measures. The HEA takes 1-2 hours on average.

## AM I ELIGIBLE?

- Virginia single-family detached homes, townhomes and duplexes served by Appalachian Power are eligible for the Home Performance Program. Renter-occupied homes are also eligible with electrical service in the occupant's name and written consent from the property owner.
- Your home must be heated by electricity to qualify for certain measures and incentives.
- Income-eligible households can now take advantage of even bigger incentives! **Home Performance Plus** provides a variety of energy-saving improvements beyond the initial HEA.
